

Symantec Backup Exec™ 15

The backup expert.

Traditional backup is struggling to keep up with increasing IT complexities and growing data volumes. Make the move to **Symantec Backup Exec™ 15** for flexible, powerful and easy-to-use backup and recovery for your entire infrastructure: physical, virtual or cloud.

Customers with an active maintenance contract can make the switch to Backup Exec 15's Capacity Edition and the newly launched Capacity Edition Lite through an attractive offer. The scheme includes unlimited deployment of Backup Exec servers, agents and/or options, within the front-end data volume* (in TB) specified by the licence**. This gives you the level of protection and functionality you need, with the option to scale up as you grow.

Recover what you need, when you need it

Say goodbye to long recovery times. With Granular Recovery Technology, recover individual objects, virtual machines (VMs), applications, databases, files or folders in a matter of minutes, so that you can always get the information you want, when you need it. You'll also get a fully recoverable backup set and functional VMs—thanks to physical to virtual conversion (P2V)—which can be quickly deployed in the event of disruptions.

Protect all your data – physical, virtual or cloud – at lower costs

Backup Exec 15 offers advanced integration with the most recent releases of VMware®—including VMware vSphere® 6, VMware ESXi 6.0 and VMware vCenter Server™ 6.0—and Microsoft Hyper-V® for fast and efficient backup of future-ready data centres. Stay ahead of growing data volumes and VM sprawl with enhanced deduplication for physical and virtual backups, and cut down on storage costs and backup windows.

Manage everything easily from one central console

Backup Exec 15 comes with an easy-to-use interface for greater visibility and management of every backup and recovery job for physical and virtual environments, while its centralised administration console delivers scalable management of distributed sites.

**Front-end TB" is the size of the protected uncompressed data. Therefore, you may purchase as many TBs as the amount of data that needs protecting.

**Terms and conditions apply.

How to choose the right capacity licensing model

Backup Exec 15 now comes with capacity based licence options which offer easier ways to license and manage Backup Exec. Customers can enjoy unlimited deployment of Backup Exec servers, agents and/or options, within the front-end data volume (in TB) specified by the licences.

Backup Exec Capacity Edition Lite

offers a more affordable and easier way to manage your Backup Exec deployment, and includes the most commonly used agents and options.

Backup Exec Capacity Edition

provides all the benefits of Backup Exec 15 without any restrictions.

Here's a detailed breakdown of the differences between the two options:

PRODUCT FEATURES		CAPACITY EDITION LITE	CAPACITY EDITION
		Per front-end TB	Per front-end TB
PROTECTION COVERAGE	Virtual	✓	✓
	Physical	✓	✓
PLATFORM SUPPORT	Windows®	✓	✓
	Linux®	✓	✓
	Mac®		✓
	VMware	✓	✓
	Hyper-V	✓	✓
APPLICATION SUPPORT	Microsoft Exchange™	✓	✓
	Microsoft SQL Server®	✓	✓
	Microsoft SharePoint®	✓	✓
	Active Directory®	✓	✓
	Oracle®	✓	✓
	IBM® Domino®	✓	✓
	Symantec Enterprise Vault™	✓	✓
OTHER KEY FEATURES	Physical to Virtual conversion	✓	✓
	Centralised Management		✓
	Advanced Disk Backup		✓
	Deduplication		✓
	Physical Tape Drive Library Support	Single drive	Multiple drives
	Virtual Tape Drive Library Support	Single drive	Multiple drives
	NDMP support		✓
	File/Email Archiving		✓

Terms and conditions:

- Only customers with active maintenance licences are eligible***.
- New licence purchases will need to be made before 6 April 2015.
- Eligible Backup Exec products that qualify for upgrade are listed below:

• Backup Exec Server	• Deduplication Option
• Agent for Windows	• NDMP Option
• Agent for Applications and Databases	• VTL Unlimited Drive Option
• Agent for VMware & Hyper-V	• File System Archiving Option
• Agent for Remote Media for Linux	• Exchange Mailbox Archiving Option
• Agent for Linux	• V-Ray Edition 2 to 6 cores
• Agent for Mac	• V-Ray Edition 8 plus cores
• Library Expansion Option	• Small Business Edition
• Enterprise Server Option	• Small Business Edition Agent for Windows

- Customers can choose to upgrade to either Capacity Edition or Capacity Edition Lite.
- Customers who wish to migrate in the middle of their current maintenance period will need to forfeit the remaining support period. No credit will be given for unused support.
- Customers are not required to purchase the amount of TBs equal to the amount of eligible number of Backup Exec licences they have.
- If customers need more TBs than the amount of eligible Backup Exec licences they own, they are required to purchase the remaining TBs at the standard price.
- Eligible licences exchanged for migration will be retired.
- The 'XGRD from Eligible Backup Exec products' cross-grade SKUs must be used to migrate to capacity.
- Symantec reserves the right to amend the terms and conditions of the programme.
